

Presagio: AI That Understands Your Data

Overview

Presagio is Proximo's flagship AI platform, built to help organizations unlock the full potential of their data. Designed for scalability and security, Presagio leverages Microsoft Azure to ingest, store, and process structured and unstructured data from diverse sources. It then deploys custom-trained LLMs and machine learning models to deliver intelligent insights through a secure, user-friendly interface.

Key Features

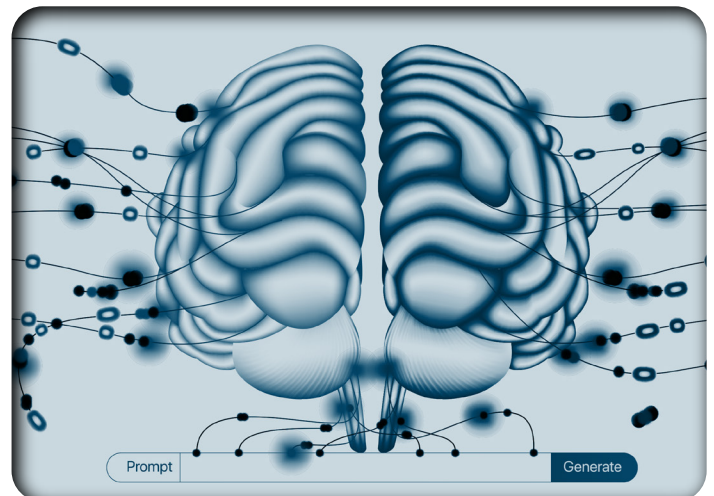

- **Custom LLMs:** Train models exclusively on your data—ensuring relevance, accuracy, and privacy.
- **Secure Architecture:** Built on Azure with encryption, RBAC, and audit logging to meet enterprise-grade compliance.
- **Pluggable AI Agents:** Automate workflows, validate data, and trigger predictive models with modular agents.
- **Multi-Source Ingestion:** Supports data from SQL, lake houses, Blob Storage, IoT streams, and more.

Association Use Cases

- Analyze across quantitative and qualitative data sets
- Create project plans based on internal SOPs
- Research & synthesize decades of proprietary journal articles and peer conversations

Benefits

- **Faster Decisions:** Ask questions and get answers instantly from your own data.
- **Reduced Burden:** Proximo's "Analytics as a Service" model means we handle the heavy lifting.
- **Scalable & Flexible:** Start with one model, expand to many—across teams, departments, or clients.

Why Presagio?

Presagio is built to anticipate what's next. It's not just a platform—it's a partner in your data journey. Whether you're exploring customer behavior, optimizing operations, or building predictive models, Presagio delivers clarity from complexity.
